TEQUILA

*VOLANS \ 'vō- lanz \ n 1: A constellation in the southern sky representing a Flying Fish. 2: An Award-Winning Premium Tequila.*

## #1 RATED TEQUILA DISTILLERY

NOM 1579 - El Pandillo Distillery is the highest rated tequila distillery in the world, based on 75,309 ratings (including 8737 blind ratings) from 56,474 users on Tequila Matchmaker app - 2019.

Our Master Distiller, Felipe Camarena is an Award-winning tequila maestro and lives in the highlands of Jalisco, Mexico. This family-owned and operated distillery goes back four generations.

## 100% BLUE WEBER AGAVE

Every agave is harvested at the peak of maturity, then we cut the cogollo or shoot, this reduces bitterness to our distillate. We then use the remains as fertilizer.

## PERFECTION TAKES TIME

Slow and low is the name of the game with Volans Tequila. We cook our fully mature Blue Agave for 22 hours at 94 degrees, then let them cool for another 24-36 hours. It takes another 2-3 days to crush the cooked agaves and then the Mosto ferments for another 5 days.

## 100% ADDITIVE FREE

100% natural. Water, Agave, Yeast, Period. No added glycerine, flavors, colors, aromas, or any other chemicals.

## OXYGENATION

We aerate/oxygenate our Blanco tequila for a smoother finish. Oxygenation is a process where micro-oxygen bubbles are mixed with the chemical compounds of the distillate; this process helps evaporate the less desirable compounds in tequila and bring out a light, clean & smooth finish.

## TASTING NOTES

“Yet another great product from [Volans] & El Pandillo. It has that mineral aroma and flavor that this distillery is known for. Also citrus and floral aromas. Flavor and finish are pretty much all agave. The aeration makes it super rounded, accentuating the sweetness of the agave... insanely soft and easy to drink. Kinda Dangerous!”
